The Indian Medical Association and Association of Physicians of India have flagged the need for updated prescription guidelines and structured training programmes. At the same time, the Central

Drugs Standard Control Organisation has noted a rise in complaints related to unsupervised injectable use and recently listed its potential side effects. This has been exacerbated by the unauthorised grey-

market versions of the drug that appeared in early 2026, prompting a crackdown on clinics selling unverified peptides. "It is a serious medication and we continue to make every effort to ensure that it
