THE YEAR 2026, in its beginning, seemed like any other year. But one month in, it revealed its true colours. It brought with it what seems like an insurmountable challenge—navigating the challenges unleashed by the West Asia-US-Israel war. From supply chain disruptions to energy security and a changing world order, India Inc. is looking at an uphill road from here.

The 14th edition of the BT India's Best CEOs awards brought the sharpest minds of the country under one roof to discuss this and more. Anchored in the theme of "The India Advantage in a Fragmenting World," the event, held at Sofitel, Mumbai, saw business leaders, policymakers, and experts break down how India can build leverage in a world full of fault lines.

From the importance in leadership during turbulent times, to volatile gold and a crumbling rupee, the titans of the industry weighed in on ways to sail across choppy waters.

Over the next few pages, we bring you the highlights of the various sessions at the event. Read on! **BT**
