

GROWTH DESPITE WAR

Multilateral agencies have upped India's GDP growth forecast for FY27, despite the West Asia uncertainty. The forecast relies on greater clarity on US tariffs and strong momentum in FY26, which recorded 7.6% growth. While the International Monetary Fund upped India's GDP growth forecast to 6.5% from 6.4% in January, the World Bank raised it to 6.6% from 6.3% in October. The Asian Development Bank also revised India's GDP estimate to 6.9% in FY27 from 6.5% earlier. Policymakers in New Delhi are keeping their fingers crossed as worries abound over a below-average monsoon as well.

BIG ACQUISITION

Sun Pharma's reported \$12-billion bid for Organon & Co, if completed, would be among the largest overseas acquisitions by an Indian pharmaceutical company, bringing a global women's health portfolio and US commercial operations. Sun Pharma has described reports of the transaction as "speculative" in a recent exchange filing, stating that no material event requiring disclosure under Regulation 30 had occurred. However, people familiar with the matter indicated that the company has completed due diligence over the past few months and is working on financing arrangements with global lenders involved.

DELHI'S GOODBYE TO ICE TWO-WHEELERS?

The draft Delhi Electric Vehicle (EV) Policy 2026, unveiled on April 11, 2026, bans registration of internal-combustion engine two-wheelers from April 1, 2028. The proposal states that only electric two-wheelers will be eligible for new registrations in the national capital. The draft EV policy also mandates electrification of three-wheelers from January 1, 2027. Meanwhile, the Society of Indian Automobile Manufacturers has called for bringing more stakeholders to promote EV adoption instead of resorting to bans or mandates.
