

TUDOR BLACK BAY CERAMIC

The Tudor Black Bay Ceramic, introduced in 2021, showcases Tudor's technical expertise with a bold blacked-out evolution. The latest version features a matte-black ceramic bracelet with a three-link design and butterfly clasp. Its monobloc ceramic case combines sandblasted and polished surfaces for contrast, complemented by a ceramic bezel and a dark, monochrome dial. Lightweight and durable, it remains highly wearable. Powered by the Manufacture Calibre MT5602-U, it offers a 70-hour, "weekend-proof" power reserve, allowing uninterrupted use after days off without winding.

ROLEX OYSTER PERPETUAL 36: LETTERS OF NOBILITY

In recent years, Rolex has introduced vibrant, colourful watches, likely to appeal to younger buyers. The Oyster Perpetual 36 continues this approach, featuring a multicoloured lacquer dial with the Rolex name displayed in ten contrasting hues. The watch is crafted from Oystersteel, a proprietary alloy used exclusively by Rolex, and powered by the calibre 3230, a self-winding mechanical movement developed in-house.

This year also marks the centenary of the Oyster case, first introduced in 1926. The waterproof and dustproof innovation was the brainchild of Hans Wilsdorf, the founder of Rolex, who dreamt of adding the wristwatch to the technological innovations transforming society.
