

A COAL INDIA'S FOUR JOINT VENTURES WITH CPSUs

1

UREA PLANT

Talcher, Odisha

Partner- CIL, RCFL, GAIL and FCIL

Expected-FY28

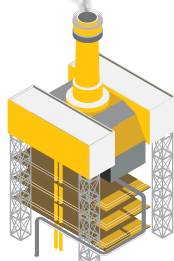

2

AMMONIUM NITRATE PLANT

Jharsuguda, Odisha

Partner- BHEL, BCGCL

Expected-FY30

3

SYNTHETIC NATURAL GAS

Bardhaman, West Bengal

Partner- GAIL

Expected-FY30

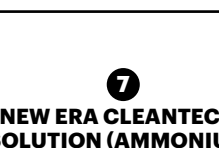

4

SYNTHETIC NATURAL GAS

Chandrapur, Maharashtra

Partner- BPCL

Expected-FY30

“The industry is pretty excited considering the abundance of coal, government support and business opportunity in the current situation”

ASHOK BALYAN

SECRETARY GENERAL,
COAL GASIFIERS
ASSOCIATION OF INDIA

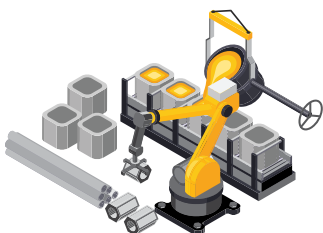

B PRIVATE SECTOR PROJECTS

5

JINDAL STEEL

Angul, Odisha

Expected-FY30

6

GRETA ENERGY AND METAL

Chandrapur, Maharashtra

Expected-FY30

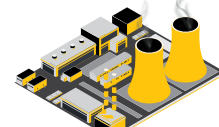

7

NEW ERA CLEANTECH SOLUTION (AMMONIUM NITRATE AND HYDROGEN)

Chandrapur, Maharashtra

Expected-FY30

8

NEW ERA CLEANTECH SOLUTION (DEMO ETHANOL)

Chandrapur, Maharashtra

Expected-FY30

INDIA'S PROBLEM WITH COAL GASIFICATION WAS IMPORTING TECHNOLOGY UNSUITABLE FOR ITS HIGH ASH COAL. MORE RESEARCH IS NEEDED TO CAPTURE AND CONVERT RESIDUAL CARBON DIOXIDE TO ACHIEVE NEAR ZERO EMISSION

R.R. Sonde, member of the steering committee for National Coal Gasification Mission 2021, says the chances of success of BHEL's gasifier are “very high because it is based on a deep understanding of India's high-ash coal and years of work.” Sonde led the IIT-Delhi-Thermax Ltd gasifier; the National Coal Gasification Mission of 2021 aims to gasify 100 million tonne (MT) coal by 2030.

Jharsuguda's is one of eight public and private sector projects to receive VGF of ₹8,500 crore in January 2024 (excluding the Adani project). Together, these are expected to substitute ₹16,000 crore of imports by 2030.

The industry is abuzz. Ashok Balyan, Secretary General of Coal Gasifiers Association of India (CGAI), says: “The industry is pretty excited considering the abundance of coal, government support
