

Last year treated patients from 38 countries

- Achieve the highest level of performance possible.
- Improve patient outcomes.
- Create an environment for continuous improvement.

The institute is known for its preventive cardiology and cardiac rehabilitation. The preventive cardiology services are aimed at reducing cardiac risk factors and helping a person in avoiding any heart disease in the future. The department of cardiology has excelled itself in performing a large number of complex interventional procedures which include complex coronary angioplasty, carotid angioplasty, stent grafting of abdominal aortic aneurysms, nonsurgical (catheter) closure of congenital heart defects, catheter ablation of complex arrhythmias, nonsurgical treatment of end-stage heart failure, etc some of which have even found mention in the international arena.

If you would like to entrust the care of your heart or that of a loved one into capable hands of an institute that is constantly setting standards of excellence in quality contact:

The Asian Heart Institute

G/N Block, Bandra-Kurla Complex,
Bandra (East), Mumbai 400 051.
Tel No.: 91-22-6698 6585/6603/6666
Fax : 91-22-6698 6506/6639

*Because every heart
deserves the best*

The only hospital outside USA to have JCI accreditation, ISO 9001:2000 & NIAHO

AHI'S ACHIEVEMENTS

Treated patients from 38 countries

- In four years the institute has successfully done over 10,000 angiographies and 2,000 angioplasties including complex angioplasties, multi-vessel angioplasties and aortic aneurysm and over 5,000 heart surgeries including complex coronary, valve, aneurysm operations.
- It boasts of one of the highest volumes in the country with over 50,000 patients treated over a span of four years and one of the lowest mortality rate in the world- 0.4 per cent in isolated bypass surgery
- It is also among one of the few centres in the world doing nearly 100 per cent bypass surgeries on beating heart and total arterial grafting.
- The international division provides seamless service for the convenience of the international patients, their family members and referring physicians. The reason behind the faith of the people, in the institute, from so many countries could only be a reassurance of AHI's commitment to quality, evident in the three certifications it has received.
- AHI has the only dedicated paediatric unit in western India. Apart from the remote corners of India, AHI has patients coming from many countries across the world.

Keeping the flame of hope alive!

The highly qualified cardiac-fraternity of the hospital is known far and wide for its expertise in conducting complex coronary angioplasties. AHI is the first hospital in the country to have successfully used cardiac recovery system to save the life of terminal heart failure patients.

The hospital provides specialised medical services in non-coronary interventions including device closures in congenital heart disease, stent grafting of abdominal aortic aneurysms and Cardiac Resynchronisation Therapy (CRT) or bi-ventricular pacing for heart failure. AHI has also pioneered the first fully digital panel catheterisation lab in Mumbai. The flat panel technology promises highest level of clarity of the angiogram without any loss of detail.

Major quality outcomes of the hospital.

- Best intensive care unit in the country with lowest hospital acquired infection rate.
- Success rate of 99.4% in angioplasties including complex cases.
- Pioneered the treatment of end-stage heart failure with the cardiac-recovery systems.
- More than 99 percent successful bypass surgeries on beating heart.
- More than 95 percent patients are receiving total arterial grafts, which are far superior to vein grafts.
- Surgical success rate of 99.5 per cent in isolated bypass surgery.
- Specialisation in other complex heart surgeries: valve repair/aneurysm surgery/arrhythmia surgery.
- Maximum experience in the country in LESS (minimally invasive bypass surgery).
