access to a remote destination

It Connect from Reliance Communications.

at a cybercafe

More than 30 million people across 8,000 towns and 10,000 villages have discovered that they can access wireless internet from just about anywhere.

... thanks to our state-of-the-art technology that helps converge voice, data and images.

Which means, you can carry our internet data card, USB modem or a Reliance handset, each capable of getting connected to the internet at an unmatched speed of 144 kbps – much faster than conventional dial-ups or other wireless networks.
