INTRODUCING

CHASETM

TOTAL SAFETY

"CAR SECURITY, INSTANT CAR TRACKING & MONITORING DEVICE"

Why

Car theft has become a universal problem. The theft not only disrupts our day-to-day life but leads to a big financial loss and distress with no guarantee of recovering the vehicle. Even the Police is unable to tackle this problem.

The various types of security devices available in the market, be it iron bar steering locks, gear locks or electronic locks, have proved ineffective. Presently there is no system, which can guarantee the total safety of the vehicle.
