

MP Online Portal, an initiative by government of Madhya Pradesh to serve it's Citizens better

grieved citizen discusses the grievance with the officer concerned online through video conferencing. Officials are also required to explain reason for the delay. The outcome is that grievance redressal has increased by four times in one year.

CM's MONITORING SYSTEM

This is yet another component of the new model of effective governance. To monitor activities of Departments for improving the overall performance of the Government and to ensure timely and effective utilisation of projects this system has been established. It involves linking outcomes where possible and / or process indicators with budget allocations. Fixing annual and monthly targets (physical and financial) in consultation with departments, and regular review by Chief Minister and Chief Secretary.

The benefits of the system are better utilization of funds, timely completion of irrigation, power and road projects. MP showed better performance in various Central Sectors and Centrally sponsored schemes.

PARAKH

Yet another remarkable initiative is Parakh, a programme of monitoring the performance of basic services like hand-pumps, transformers, schools, health services, Anganwadis, public distribution system etc. provided by 13 different Departments. It is a proper feed back system and it also extends benefits to the common man by ensuring

- Improved service delivery
- Alertness of employees
- Supervision of performance of various departments by collectors and CEOs
- Alternative information independent of the department

SAMADHAN EK DIWAS

- Citizen facilitation centre for providing services
- Citizen submits request in the morning and the document/ service is delivered before the office closes
- Centre operating in all the district headquarters
- Public Private Partnership is solicited.

PROJECT CLEARANCE AND IMPLEMENTATION BOARD

Board under the Chairmanship of Chief Secretary; Secretaries of concerned departments as members; to give clearance and follow-up the implementation of Projects on one table.

- Managing Director, TRIFAC is the member secretary.
- The Board meets twice a month.
- The Board gives clearance / sanction / consent on various aspects of a project.
- Problems of on-going projects can also be taken up in the PCIB.
- So far 45 projects worth Rs 127,754 crore have been considered by the PCIB; 34 projects worth Rs 97,971 crore have been facilitated.
- Implementation of 8 projects has begun.
- Policy-related / inter-departmental issues also resolved by the Board.
- The average time taken to clear a project is 27 days.

DRIVING LICENSES AND VEHICLE REGISTRATION

The Smart Card-based driving license and vehicle registration is one more feature of the new system. Under it vehicle driving license and commercial vehicle data are available on web (www.mptransport.org) and SMS (9827020002). The computerised receipt management system and daily reconciliation with the bank has yielded more than Rs 100 crore, eliminating fake treasury challans and two or more vehicles registered on draft. The Commercial Vehicle Tax management system has improved tax collection.

BHU ABHILEKH (LAND RECORD)

The Bhu Abhilekh initiative is ascertaining to be another boon for masses, which includes

- Computerisation and updation of land records
- Computerised records being provided to citizens
- Digitisation of maps – in process

The new system deployed for land records is of high benefit for general public as the records in the computer are updated on regular basis to create a hassle free environment, the villagers can obtain land certificate (ROR (Record of Right) also called Khasra) from the counter of Tehsil headquarter, the credibility factor is high with the transparent system as no tampering of records are possible. The record details are accessible on the click of a mouse; the other details like area of land, land under cultivation etc. are also available on website www.mpbhuabhilekh.nic.in.

COMMERCIAL TAX INFORMATION SYSTEM

All Commercial Tax Offices computerised and networked. Simple Database of transaction with facility to monitor tax paid yearly has substantially reduced tax evasion. Revenue has almost doubled. VAT implementation will further eliminate all possibilities of evasion. Online submission of return will be implemented soon.

With a reformed and streamlined administrative functioning Madhya Pradesh is well on way to the next ambitious stage of development.
