

## OVER THE WICKET

### 1. The Outswinger

The bowler swings the ball by slanting it across the right hander and sets up the catches in the slips.

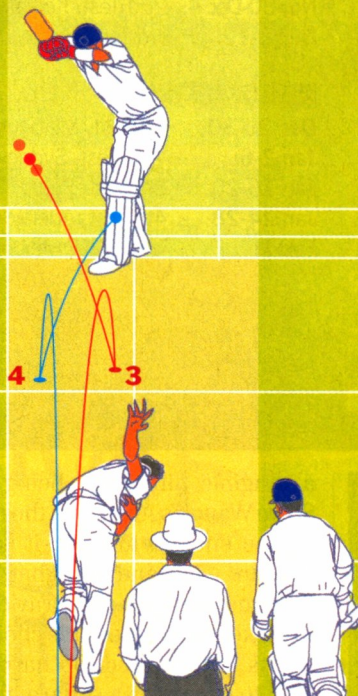

### 2. The Inswinger

In this case, the ball swings late, comes back into the right-hander which is what sets up the LBW for the right hander.

## AROUND THE WICKET

### 3. The Outswinger

The ball pitches and leaves the batsman, again setting up the slip catches. This is how Zaheer Khan got the wicket of Michael Vaughan at Trent Bridge.

### 4. The Inswinger

The ball pitches and then comes into the batsman. This is how R.P. Singh got the wicket of Kevin Pietersen at Trent Bridge.

the bowler from pitching the ball at a length where it has time to swing, then cramps you and hits you on the pad."

In England, swing is not a phenomenon, but a natural condition, it is almost as if exists in the air. Swing bowling is considered the most English of cricketing skills but today they are too few left-armers in county cricket. So when two men from the land of spin—one who looks like a distant cousin of the brooding Heathcliffe, the other a Bollywood wannabe straight out of university—turn out to be masters of an English art, naturally the hosts are enchanted.

Not Pringle though. He is excruciatingly careful not to praise too much, "They are not frightening by any means. I wouldn't be worrying about this bowling line up if they weren't swinging the ball. It doesn't look too fearsome on paper." In this series, Khan and Singh have demonstrated eloquently that if you're a lefty who's got what the Duke ordered looks really don't matter.

the Duke's ball.

Fielding coach Robin Singh would have been pained by some of the Indian ground fielding, though the team's catching has been relatively bloop-free, a result of having worked specifically to get used to catching in England's cold. "It's important to catch well on bowler-friendly wickets... You cannot use the weather as an excuse. With catching you have to practise it every day, the specifics have to be done, whether you like it or not," he says.

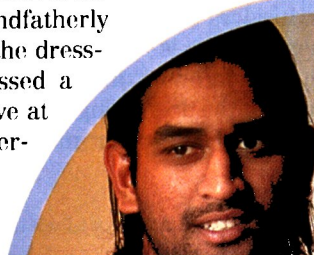

Many on the team mentioned of the presence of the almost grandfatherly manager Chandu Borde in the dressing room. Borde never missed a practice session, would arrive at meetings with notes and obser-

vations and dished out unobtrusive tips to the batsmen. He advised Jaffer to skip rope for a few minutes before going out to bat to improve his footwork. At a heated press conference, Borde deflected bouncers about Dravid's decision not to ask England to follow-on at the Oval, in his sing-song, what's-the-fuss-about tone.

The decision not to enforce the follow-on at the Oval raised a ruckus amongst both the 'commentariat', and the wider proletariat. Dravid explained

himself in cool cricketing terms, talking about the fatigue of his bowlers and taking a well-directed swipe at 'arm-chair' sections. Standing on the podium with his magnum of champagne and man of the series cheque, Khan said he wasn't tired, but the decision not to take a second tilt at England was governed by more factors than the physical condition of Khan and his brethren.

On the morning Dravid decided to bat again, it was impossible not to be reminded of a similar moment. In Sydney in 2003-04, locked 1-1 with Australia, India were faced with the question of enforcing the follow-on after scoring 705-7. Then captain Ganguly decided against it, to much the same response. While there is
