Imparting Management Education in Indian Context

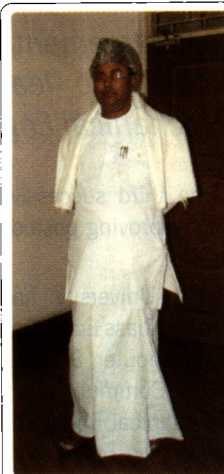

British transformed the well-established Indian Human Capital into 'Babus' and Labour forces and today's Management Education in India, which is a poor imitation of US System is producing a bunch of White Collar Managerial Labour.

Our management Education scenario has taken an irrational, impractical, non-focused and non-contemporary shape, under the clutch of Indian University System, which is intellectually dead. The Leadership quality with a broad vision, open to the ideas and clear-mind-setup are the primary ground for creativity, innovation, deep thinking and entrepreneurship with the strong ability of execution enriched universal values should be the main focus of management education for managing new India with global competitiveness.

The universities, which do not even revise their curriculum for decades, how can they achieve excellence? For excellence in Management Education, we need a band of quality people, which is the main concern of this country, since the quality people are not associating themselves in the process of building excellence and competitiveness in this country. As of these, quality human resources are involved in selling Toothpastes, Credit Cards and Washing Powders and the people who are supposed to do these are engaged in building so called vague excellence and competency.

We need to create a strong movement for building a large

number of flagship autonomous institutions, which was the vision of our Hon'ble Former Prime Minister, Shri Rajiv Gandhi and still yet to be fulfilled. But an over all revamping and restructuring is earnestly needed - right from the establishment process with proper investment and stock holding mode of these institutions, involvement of the quality people, creating a focused and contemporary curriculum and execution of the same, keeping in view of the global competitiveness and excellence with the technological know-how for managing the system is the key and hidden secret for future success in Management Education in India, otherwise Indian Management Education should wait for its extinction.

“ We need to create a strong movement for building a large number of flagship autonomous institutions for management education in the country. ”

I.T.S Group of Institutions

Shining Star at NCR

Institute of Technology And Science group of educational institutions is a fast growing group which has since evolved as a brand in the world of education. Established in 1995 under the aegis of Durga Charitable Society, what started with its first Campus at Mohan Nagar, Ghaziabad is now four campuses strong, with establishments at Muradnagar and Greater Noida, imparting multi-disciplinary curriculum. The wide spectrum includes fields of Management, Information Technology, Engineering, Dental, Bio-technology, Pharmacy, Paramedical Science and related vocational courses.

The Group is headed by Mr. R.P. Chadha as its Chairman who believes in nurturing the potential and ensuring it to grow into a commitment to create a Thinking Professional Order. There is a strong societal, industry, professional and fraternity participation rendering the graduated students as highly sought after product in the professional field.

All the Institutes are supported by full-time experienced and qualified faculty who also act as mentors. The infrastructural support, the library and laboratory resources and the information technology backing are in the nature of the state-of-art. All the courses are either affiliated to Universities and/or AICTE approved/accredited. Apart from ISO 9001:2000 certification, the Campuses are Wi-fi enabled. Value added inputs together with research work, seminars, paper

presentations, MDPs and FDPs are a way of life. The Group lays due stress on the development of the students not only as a professional but also as a worthy member of the society.

The ITS Institute has 4 different campuses offering different professional courses. The Mohannagar campus started in 1995 offering PGDM, approved and accredited by AICTE & equivalent to MBA by AIU. The MCA / MBA programmes are approved by AICTE, & affiliated to U.P Tech. University Lucknow. The BBA / BCA programme is affiliated to C.C.S Univ., Meerut. The Institute is a recognised centre for Doctoral Programme (Ph.D) in Information Technology & Management from U.P Tech., Lucknow & C.C.S Univ., Meerut

The Campus at Muradnagar started in 2000 imparts MDS (Approved by Dental Council of India), BDS (Recognised by DCI & affiliated to CCS), M.Sc(Biotech)/B.Sc (Biotech) and BPT (Affiliated to CCS University, Meerut) & B Pharma which is approved by AICTE, & affiliated to U.P Tech. University Lucknow.

The Greater Noida Campus started in 2006 and located in Knowledge park III offers B.Tech (approved by AICTE, & affiliated to U.P Tech. University Lucknow) with specialisation in CS, IT, EC, ME & EE & MCA which is also Approved by AICTE, & Affiliated to U.P Tech. University Lucknow. This year it has started with its first batch of PGDM approved by AICTE.

The newly launched Dental College & Hospital at Greater Noida offers BDS which is approved by Dental Council of India.
