

Just like Achilles. But without the heel.

IWC
SCHAFFHAUSEN
SINCE 1868

"Respect!"

Big Ingenieur. Ref. 5005: We all have our weaknesses. Except for this watch, of course: a solid stainless steel case with a sapphire glass back cover protects the world's largest automatic movement from IWC against impacts. The Pellaton winding system generates a seven-day power reserve that keeps the Big Ingenieur running even if it isn't moved for a week. But as long as nothing untoward happens to your heels, that's hardly likely. **IWC. Engineered for men.**
