"Cars costing more than ₹20 lakh have price parity. The Harrier EV is priced less than the automatic ICE Harrier," says Chandra.

THE ELECTRIC SHIFT

The shift to EVs is no longer just driven by enthusiasts.

"EV adoption is now expanding well beyond early adopters and enthusiasts," says Chandra. "The mainstream customer has arrived. And this shift is already visible," he adds, calling the West Asia crisis a catalyst for electric mobility.

Puneet Gupta, director of Mobility Global, an automobile data intelligence company, agrees. "Customer acceptance of EVs is going up. Today, EVs have more range and bigger battery packs that are helping reduce range anxiety. Some EV models even offer over 400 km of real-world range," says Gupta.

M&M saw a surge in EV demand after Prime Minister Narendra Modi urged citizens to use electric vehicles amid the West Asia war. "While it is still early, we are seeing a surge in interest in EVs, especially from central and state governments," Rajesh Jejurikar, executive director and CEO, Auto & Farm Sectors, M&M, tells *BT*.

"EVs are moving into the mainstream, supported by growing consumer confidence and positive word of mouth," Jejurikar adds.

Thanks to their low running costs, EVs are increasingly being used as primary cars for city commutes. "One cannot argue against the unit economics of using an EV. EVs are not a Tier I phenomenon. It is happening in
