PSUs KEY SOURCE OF NON-TAX RECEIPTS

Disinvestment isn't the government's only source of income from PSUs. Over the past few years, dividends from CPSEs have remained consistently higher than disinvestment receipts, making them an important source of government revenue

TOP FIVE MINISTRIES

Dividend receipts were heavily concentrated among a few ministries. The Ministry of Petroleum & Natural Gas alone contributed nearly ₹1.05 lakh crore over the last five years—nearly equal to the amount raised through disinvestment during the same period

MORE VALUE TO UNLOCK

Despite years of disinvestment, the government continues to hold sizeable stakes in several listed PSUs. Its stake in LIC alone is currently valued at over ₹5.25 lakh crore, highlighting the value that could be unlocked in the future
