largest generation India has ever produced. As the cohort enters the workforce and entrepreneurship in greater numbers, it is reshaping the innovation landscape.

Their ambitions are shaped by an ecosystem very different from the one that produced Flipkart or Ola. AI has lowered the barriers to building software, digital access has made global markets visible from day one, and access to capital has given way to greater scrutiny of business models.

CAPITAL EFFICIENCY

Roshni Rathi, Managing Director and Partner at BCG India, says the shift is more fundamental than incremental.

“Earlier generations often relied on raising significant capital to acquire customers and scale. Today’s founders can build, launch and monetise products much faster
