

PATIENCE PAYS FOR WOCKHARDT

AFTER SPENDING NEARLY ₹6,800 CRORE AND MORE THAN TWO DECADES, WOCKHARDT HAS ACHIEVED WHAT NO INDIAN PHARMACEUTICAL COMPANY HAS BEFORE: US FDA APPROVAL FOR A NOVEL DRUG DISCOVERED AND DEVELOPED IN-HOUSE. ZAYNICH IS EXPECTED TO DRIVE WOCKHARDT'S NEXT PHASE OF GROWTH AFTER IT RETURNED TO PROFITABILITY IN FY26

BY **NEETU CHANDRA SHARMA**

A MOLECULE OF SUCCESS

➔ Zaynich is the first novel molecule discovered, developed and commercialised by an Indian pharmaceutical company to get US FDA approval

➔ Wockhardt invested about \$800 million (₹6,800 crore) in antibiotic research over 25 years, a rare commitment in a field abandoned by most global drugmakers
