Uttar Pradesh is the FASTEST MOVER

Fastest Mover is the state where the rate of improvement on overall performance between 2003 and 2007 was greater than the rate of improvement between 1991 and 2003

THOSE WHO HAVE ADDRESSED SOCIAL ISSUES LIKE INVESTMENT IN AGRICULTURE, EDUCATION AND HEALTH HAVE BEEN ABLE TO WEATHER THE STORM OF CHANGE.

vestment in agriculture, education and health—have been able to weather the storm of change. However, many states would need to thank history for their good fortune. Punjab and Kerala, for instance, have in some sense inherited their performance, thanks to the vision of the early regimes.

Those ruling Kerala must thank the initiative of the E.M.S. Namboodiripad regime for social infrastructure model. The state indeed continues to lead in health and education but the legacy of absence of industry also continues as it has been unable to build on the social infrastructure to lure investments or create a consumer market that would attract investments. Punjab similarly has to thank Jawaharlal Nehru and Bhimsen Sachar for pushing the idea of Bhakra Nangal. It also has to thank the accident of geography that led to it being at the centre of the Green Revolution. Indeed scores and rankings across a period show those with a good track record on the top. Although the top-per, Punjab had been slipping on five parameters in the past three years which had led to a slippage in investment scores but there seems to have been some course correction with scores improving on six parameters but political populism has led to lower score in macro-economic management.

Like in the past, states have been classified into big and small. Big states are those with an area of more than 35,000 sq km and a population of over five million. Scores (or index
