Tamil Nadu is the FASTEST MOVER

Fastest Mover is the state where the rate of improvement on overall performance between 2003 and 2007 was greater than the rate of improvement between 1991 and 2003

Jharkhand, Uttar Pradesh, Chhattisgarh and Orissa are no better on most parameters. Take law and order, for instance. The top state Kerala scores 4.15 on a scale of 10 and the score for the next best state, Tamil Nadu is 2.18. Indeed, of the 30 states and five Union territories, only two states—Kerala and Puducherry—muster over 40 per cent scores on this parameter while 19 score less than 1 on the scale of 10. Uttar Pradesh, despite claims made in the last Assembly elections, is the worst among big states with a score of 0.30 out of 10 while among small states, militancy-affected Manipur scores a pathetic 0.08. Even the overall champion Punjab scores barely 0.54. The story is better said if one just looks at the 499,951 pending cases, the 122,108 cognisable offences registered, the poor presence of policemen at 120,139 in Uttar Pradesh. These scores are a translation of the pathetic state of internal security. Look at the disturbing condition of primary health services across north India.

SAPTARSHI BISWAS

SPEND METER:
Markets indicate development

THE TOP STATES IN CONSUMER MARKET HAVE PER CAPITA INCOMES BETWEEN Rs 63,000 AND Rs 30,000 WHILE IN CHANDIGARH THIS FIGURE IS Rs 71,000.

Sixty years after Independence, only 27 per cent of child birth cases are medically assisted in Bihar, Chhattisgarh and Jharkhand. Very simply, seven out of 10 children in these states are delivered without medical assistance, which explains why for every 1,000 children born as many as 60 die at child-birth.

It is not just law and order where the states are faring bad. To comprehend the scoring rationale imagine sitting for an exam where the maximum one can score is 10. On any parameter, to do the best the states must score 10 on 10. So, for instance, for a state to achieve the best in, say education, it should have ideally scored 10 whereas even the best big state has scored just 4.19 out of 10 or simply 41
