

EDUCATION HAS TWO PURPOSES: THE INCULCATION OF knowledge and training in right, morally correct and socially useful conduct.

Education creates valuable human resource, which today is taken more seriously than all natural, material and financial resources put together.

Naturally, the cutting edge of India's economic growth is not a high per capita GDP level, but high grade human capital.

And where is this prized, excellent, world-class human resource forged? Of course, in our educational institutions, some of which compare favourably with the best anywhere in the world.

It is in these institutions that future leaders are being "manufactured", figuratively speaking, of course. These institutions prepare young men and women who have the mental equipment, extraordinary vision and moral courage to provide the right kind of leadership in business and industry, society and polity.

All of us want to get our children the best education we can, education that empowers our next generation. Parents do scan the entire educational landscape in India for this purpose. Our **IMPACT FEATURE** is aimed to provide you with a navigational chart of some of the educational institute that are working towards bridging a gap of demand and supply of trained, skilled talented human resource; which is considered to be the best in the world.
