

SKIT GROUP OF INSTITUTIONS

Preparing Industry Ready Students

WITH THE BLESSINGS OF SWAMI KESHVANAND JI, SKIT GROUP WAS established in the year 2000 with the Inception of Swami Keshvanand Institute of Technology, Management and Gramothan (SKIT), Jalpur. As a result of an excellent response from the people of the state to SKIT, Jalpur, the group started Marudhar Engineering College (MEC) in Bikaner in the year 2003. The group also began Master of Business Administration and Bachelor of Pharmacy Programs at Jalpur campus and Bachelor of Pharmacy Program at Bikaner campus and plans to introduce Master of Business Administration courses at its Bikaner campus.

In last few years, SKIT has emerged as one of the best institutions in the country and its students have been well recognized by the leading industries. Excellent Placement services and industry attachments are the main features of our institutes. Both SKIT and MEC are members of the Campus Connect Program launched by M/s. Infosys Technologies Limited, Bangalore in July 2004. Under this program our faculty has been trained at Infosys Research & Education Centers to prepare industry ready students. SKIT also conducts IBM training programs under IBM academic initiative for various technical sessions including Tivoli Reach 2006, IT Infrastructure Management Solutions. SKIT is also a part of

"Campulse" program of M/s. Satyam Computers, Hyderabad. This is a unique mentorship program which intends to groom and mentor students.

SKIT is one among the ten engineering colleges of the country, selected by M/s. Syntel Inc., Mumbai under its Campus Integration Program. SKIT provides excellent placement opportunities to each of its students in well-known and reputed companies. A very good number of multinational software and other companies such as Infosys Technologies Ltd., Bangalore, Crompton Greaves Ltd., Mumbai, IBM India Pvt. Ltd., Gurgaon, Syntel India Ltd. Mumbai, I-flex Solutions, Mumbai, Atos Origin, Mumbai, Impetus, Indore, Indian Air Force, Indian Army, Indian Navy, Inter Global Technologies, Gurgaon, L&T Infotech, Mumbai, Sterling Telecom & Net Systems Ltd., Chennai, Zdrive, Japan, do visit SKIT every year. 176 students (out of a batch of 420) of the current third year batch have already been placed in very good companies, these students will be entering into the final year of their B.E. in July 2007.

Our students have carved a niche for themselves in the professional arena and are truly our torchbearers. Industry reviews exhibit that our students are most competent to take every challenge head-on.

ANSAL INSTITUTE OF TECHNOLOGY

A Twin Advantage - Best of Both Worlds

PROF. M.P. SINGH, PH.D. (MARYLAND, USA), FNA, A FULBRIGHT SCHOLAR and an Ex-IIT Professor, who is a renowned academician in the country highlights the major advantages of International Collaborative programs for the benefit of brilliant students aspiring for global career in professional fields. He has been offering career advice to IIT students and others for over 40 years on international education.

Perfect Combination: They offer an ideal combination of studies in India during the formative years (in theoretical subjects where we are strong) and the overseas component in specialized subjects that are studied in the final semesters, where the foreign university has an edge in terms of lab facilities and research opportunities.

Flexibility: Most such programs offer flexibility in the choice of majors. For example, someone majoring in Computer Science can also choose to take subjects like Biology, Sociology and Communication, etc. In some cases a four-year undergraduate degree can be completed in about three years by attending additional terms during summer.

Scholarship: In most cases, education overseas is very expensive entailing a high cost of living. Foreign collaborating universities attract talent by offering them

scholarships / assistantships, which bring down the overall cost significantly. In certain cases, the university restructures the entire fee structure in accordance with Asia-Pacific standard of living and affordability.

Accreditation: One should only join accredited programs. This is an important consideration in assessing the recognition and equivalence of foreign degrees in India. Unaccredited institutions exist in many countries. The onus lies on the student to verify the reputation and track record of a foreign university before he or she enrolls in the particular institute's courses.

International Exposure: A student can look forward to a cross-cultural interaction with students of other nationalities. Further, during the optional practical training period or during the Industrial Cooperative Program (an integral part of study), the student will be exposed to the best practices of a global corporate environment and learn more about the work ethics of present day business.

Prof M.P. Singh has been providing visionary leadership as the Founder Director, Ansal Institute of Technology, Gurgaon to spearhead the International Collaborative program to achieve excellence in professional education.
