

Parents and Children Deserve to Know Opportunities for a Global Career in a Global Economy

Ansal Institute of Technology, set up in the year 2000 by the prestigious Ansal Group on a sprawling WiFi campus in Gurgaon, the hub of MNCs, has acquired International reputation in providing world class education for professional programs leading to UG and PG degrees recognized the world over.

AIT is a genuine pioneer, a trendsetter in many respects. its unique transfer of credits system coupled with provisions of scholarships/Coop programs with reputed and accredited American universities like Clemson University (CU), North Dakota State University (NDSU), San Jose State University (SJSU), Eastern Michigan University (EMU), Tarleton State University (TSU) and many others enables its students to enjoy advantages which no other educational institution in the country is able to match.

students graduating from San Jose State University for employment in Silicon Valley is extraordinarily impressive and the graduates passing out get huge internship of about US\$ 60,000 per annum. A similar program exists with University of Western Australia (belonging to the prestigious Group of 8 Australian Universities - after 2-years coursework at Ansal Institute, students can earn dual degree UG and PG in Information and Communication Technology in 3 years in Australia as transfer students with potential of permanent residency in Australia).

For the Postgraduate Programs (MBA & MS), students need to complete one year of course work at AIT to get AIT's PG diploma in the relevant field. After that, they will be eligible for transfer to the concerned US University with a provision of

Students from countries like USA, Canada, France, Thailand, Maldives & Nepal come to study at AIT.

Unique Academic Programs: All BS degrees from US universities are of four years duration (8 semesters). Students who successfully complete 4-6 semester broad-based academic program (similar to that followed at the IITs) at AIT are eligible to transfer their credits into full-time degree programs of reputed and accredited US Universities (that have scrutinized and approved AIT's coursework for equivalence). As a result, only the final 2- 4 semesters are required to be done in the US University for their coveted US degree. Students who wish to go for a Dual Degree (Bachelor's and Master's) can do two years studies at AIT followed by three years at the overseas University campus. Such an integrated program from the Department of Computer Engineering (San Jose State University) has been started leading to BS & MS degrees in Software Engineering from SJSU followed by opportunities of one-year paid internship in the Silicon Valley. The track record of the

"One smart move changed my son's life. Lavnish made it to AIT where his potential was nurtured and he proceeded to the US for a global career. The AIT teachers are proud of him and as parents we are overjoyed."

Mr. Buddhiraja
(Proud father of Lavnish who went from AIT to the US for his BS and MBA degree)

substantial scholarship. They will get the US University's MBA/MS degree in about 2-3 semesters of studies there.

Extension of Academic Linkages : The extraordinary track record of AIT alumni in the US has stimulated the extension of this transfer of credits system with other leading overseas Universities, which include McMaster University (called MIT of Canada; considered No.1 in Canada), University of New Brunswick (among Top 10 Canadian Universities), University of Windsor (Canada), Saint Mary's University (Canada), Deakin University (Australia), University of Canberra (Australia), University of Plymouth (UK) and University of Science and Technology, Lille (France), etc.

A rare offering of scholarships, internships and placements:

"Such an exposure into the global IT arena wouldn't have been possible for me without AIT. When I think of my respectable designation, the handsome salary that I get with so much recognition, I get affirmative of the wisest decision I took by enrolling into AIT. I hope I continue to live the tradition of AIT excellence."

Gunjan Sharma, Batch 2002
(Presently working in Investment Technology Group Inc. Los Angeles, CA)
