

"When I look back and analyze what all contributes to my success story till date; the first thing that comes to mind is getting enrolled in AIT. I know that in the future, I will have an advantage over the other students, because the transfer program of AIT gave me an express gateway to come to the US and be a part of cross cultural communication, thereby providing me a learning edge I needed to rise to where I am today."

Rahul Pruthi, Batch 2002

(Presently working as Senior Quality Assurance Engineer with Oakwood Worldwide in California, USA)

Along with the transfer, AIT students can also get sizable scholarships (up to US\$ 12,000 per annum) awarded by the US universities, making the cost of US education affordable to Indian students. To cap it all, after getting their undergraduate degrees, AIT students have the opportunity to get admission to postgraduate degree programs in the US universities; again with substantial scholarships / assistantships for those who perform well in academics. Clemson University proposes to commit a couple of assistantships to AIT's meritorious students to pursue MS program in Engineering after their UG Engineering degree from Clemson. A similar arrangement for MS in Information Systems is being worked out by Tarleton State University for AIT's PG students.

AIT students can earn handsome scholarships at AIT (up to Rs.30,000 p.a.) based on their performance. Last year scholarships of Rs.27 lacs were awarded by AIT to meritorious students. The students on completion of their degree program can legally work full-time in the US for a period of 12 months. They, therefore, have the opportunity to get invaluable exposure to the work culture prevailing in the US corporate sector as paid, full-time interns.

To promote two-way exchange of students, a scholarship fund has been created by NDSU. The scholarship fund promotes visits of U.S. students for 1-2 semesters of studies at AIT. The first two batches from NDSU studied at AIT in 2006.

John Deere, which has a subsidiary in India, has sanctioned a grant of US\$ 100,000 to North Dakota State University for support of exchange of visits of students and faculty from NDSU to AIT & from AIT to NDSU spread over a period of four years. A part of this grant totaling Rs.5 lacs per annum has been utilized to provide scholarships to 10 meritorious Indian students to study at AIT aiming to seek transfer to NDSU. Plans are afoot to provide a couple of paid internships at John Deere, Fargo to AIT students after graduating from NDSU. Merit Scholarships of C\$1,000 to C\$3500 are also available to meritorious students from AIT to study at St. Mary's University, Canada.

Impressive Track Record: Hundreds of AIT students have been accepted by reputed foreign universities in the US, Australia & Canada and are bringing laurels to the Institute. In August 06 itself, 103 students from AIT went to the US universities to complete their degrees. Most of these students have gone on scholarship/assistantship to complete the coveted overseas degrees. AIT alumni in the US have won more than 40 President's and 60 Dean's honor awards for their excellent academic performance. AIT students, on completing BS degree, have got opportunities to do MS/Ph.D from such leading universities like Johns Hopkins, University

of Illinois, Vanderbilt University, Keck Graduate Institute, Georgia Tech, Australian National University, Asian Institute of Technology and Embry Riddle University.

Extraordinary Facilities: AIT's 15 acre campus provides state-of-the-art computer and other labs, modern networked library, book bank, on-campus lockers, bookstore and other allied facilities for sports, transport facilities from major parts of Delhi and Gurgaon and international standard on-campus hostel separately for boys and girls for which **Prof. T.J. Pedley, University of Cambridge, UK** has the following to say, **"a most impressive, very modern institute: the hostel accommodation is superior to that in most British universities."**

Strong Industry Interface: The institute follows innovative approach in delivery of education towards achieving excellence by introducing an important component constituting hands-on training in emerging technologies. AIT's unique linkages with the corporate world enhance the overall learning experience for the students. HT&E Center of Excellence at AIT set-up by a multinational company HandsOn Technology and Engineering having offices in the US, UK, Sweden and India provides ample opportunities to the students to work on real-life projects from the Industry. The world leader in networking, Cisco Systems has recently designated AIT as the best local Networking Academy in the Asia Pacific region. Technology workshops by industry experts are a regular feature at AIT. Experts from UK conducted a workshop recently at AIT on 3-G Mobile Communication, WiFi and Bluetooth Technology.

AIT also has an efficient training and placement cell. Its students have been successfully placed in organizations such as Wipro, Hughes Systems, Sapient, Mahindra British Telecom, IDBI, ICICI Infotech and Sahara India.

Courses offered at AIT

UG

- Engineering (Computer/ Electrical/Industrial/ Mechanical/Biosystems)
- Computer Science
- Computer Information Systems
- Biotechnology
- Business Management
- Hotel Management
- Mass Communication
- Retail Management

PG

- Computer Science
- Software Engineering
- Information Systems
- Business Management (MBA)
- Retail Management - with Pantaloons(PRIL)
- Construction Management - with Ansal-API
