24	National Institute of Technology, Rourkela	28	28	31	31	28	29	29	29	19
25	Institute of Technology, Nirma Univ, Ahmedabad	27	27	27	26	27	26	22	27	26

National rankings are derived from a combination of perceptual and factual scores. Colleges that did not provide factual information were not ranked.

new computer science building.

But the institute does not rest on its laurels. In 2009, IIT-K will celebrate its golden jubilee, with guest lectures by Nobel laureates and the establishment of an extension centre at Noida. Dhande is making an effort to sustain the vibrancy in student-teacher relations, which, he feels, tends to fade with expansion. "As the institute becomes bigger, it also has a tendency to become more impersonal and lonely," he says.

While he might hold IIT-K to be the bastion of adventurous thinking, the other IITs are not lagging behind. Last year's top ranker IIT-Delhi has slipped down one position, but it produced the largest number of PhDs among all IITs in the previous academic year, and took on board 40 new faculty members from renow-

FROM THE DIRECTOR

"One must work outside conventional frameworks even at the cost of being ridiculed."

SANJAY DHANDE, IIT-K

ned international institutes. Third on the list, IIT-Chennai is planning to flag off its Research Park modelled on the ones at Stanford and MIT. The park is meant to enable companies with a thrust on technology to set up base, hence leveraging the institute's technical prowess. "The need of the hour is to respond to the demands of the industry through our capacity for innovation," says S. Santhakumar, dean, academic courses, IIT-C, explaining the vision behind the research park. At IIT-Kharagpur, with 14 dual-degree programmes being launched, students can do a five-year integrated Master's course. Options range from a BTech followed by an MBA, LLB or even a Master's in Disaster Management. The idea is to uphold the spirit of constant enrichment and expansion. **with bureau inputs**
