

bers to obtain higher educational qualifications and undertake various researches."

When it comes to teaching techniques GCET always keeps pace with the latest in the world. Most of its classrooms are equipped with LCD projectors and faculty members are encouraged to use computer based slides to support their lessons. This has helped in enhancing the teaching-learning experience as well as the relationship between students and lecturers.

Prof Naveen Prakash, Director, GCET, says, "We have adopted a student centric teaching process. The institution lays special emphasis on problem solving, sustained disciplined work and practical application of conceptual knowledge. We have been able to build a sound education system by improving the teaching-learning process. Our efforts have also made a positive impact on the academic community."

The institute has launched many projects and one of the most popular ones is based on the use of non-conventional sources of energy. A GCET team has developed the technology to convert a 10hp diesel engine into an LPG engine. This engine can be deployed for rural tasks. The conversion of the diesel engine can be done in about four hours by a team of semi-skilled workers. The unique feature of this product is that the engine's battery ignition system has been replaced by a magneto based electric ignition system, thereby removing the hassle of battery upkeep and maintenance in rural areas.

Sunil Galgotia, Chairman, Galgotias Group of Institutions, says, "We have developed our teaching-learning process by consulting some of the finest academicians in the country." Highly qualified people, including Prof KL Chopra, ex-director IIT Kharagpur, Prof MN Faruqui, ex-vice chancellor, AMU, Prof CS Jha, ex-director IIT Kharagpur, Prof RC Malhotra, ex-director IIT Kanpur, and Prof J Nanda, ex-director of IIT

PERFORMANCE AT PAR

GCET students recruited by top MNCs:

- 100 per cent (eligible ones) from 2006 batch
- 85 per cent from 2007 batch
- 70 per cent from 2008 batch

Delhi have provided inputs to enhance the academic content of the institute.

Students from GCET were the top ten rank holders in UPTU's 2006 merit list. Some of the toppers are Vaibhav Bajpai, Vikrant Chug and Trapti Agarwal.

GCET has established a Career Planning and Development Division (CPDD), headed by Prof PN Koul, that aims at enhancing leadership qualities and managerial skills of students. CPDD invites specialists from various fields to the campus and conducts discussions on topics relating to public speaking,

confidence-building, stress and time management, and attitude development. Mock interviews and group discussions are also organized. These make the teaching-learning procedure more effective.

CPDD functions through a coordination committee that includes faculty advisors, student coordinators, heads of departments and placement officers. This division of the institute conducts short-term industry-oriented training programmes, organizes industry visits and arranges aptitude tests for students. It also improves soft skills in students like stress management, personality development, CV writing et al. CPDD also invites MNC representatives to conduct campus interviews. Some of the companies conducting regular campus interviews and absorbing students are Infosys Technologies, HCL Technologies, Honeywell Automation India, United Technology, V Customers, Caritor India, Satyam Computers, HCL Comnet, I-Flex, L&T Infotech, Infosys, Nucleus Software, Mahindra & Mahindra, R System, Magic Software, Syntel, Wipro Infotech, HCL NEC System, Convergys, Mettler Toledo, SR Infotech, Green Field and Motherson Techno Tools.

GCET has a phenomenal track record in job placements and the interaction with the corporate world also helps the institute adopt the latest trends in the industry.
