

HERALDING A NEW ERA IN HIGH EDUCATION

SEEDLING YOUR INSTANT ACCESS TO KNOWLEDGE

EMBRACING NEW HORIZONS, NURTURING EXCELLENCE AND A FUTURISTIC VISION are the hallmarks of the Seedling Group. The Seedling Institute for Integrated Learning & Advanced Studies (SIILAS) is a part of the larger vision of this Group to bring forth a new paradigm in higher education and research for the 21st century.

Inspired by the vision of our Illustrious President Shri A.P.J. Abdul Kalam, "To make India a partner in the world knowledge platform" this institute has been established to meet the rapidly expanding horizons of knowledge, and the multifaceted requirements of the rapidly growing industrial base. With courses on offer meeting the demands of the industry it is not surprising that the institutions run by the Seedling Group, SADTM and SIILAS, are today one of the most preferred destinations for youth with a focus and genius and committed to excel in their chosen field.

**Knowledge leads you to light, Imagination
lets you grow.**

Vision: In order to understand the dynamics of the success of this group one needs to listen to what the C.E.O & Director of the group Mr. Sandeep Bakshi has to say, "At Seedling we constantly strive to become path setters in the generation of new knowledge in basic sciences, information technology, commerce and their innovative applications for improving the quality of life."

An astute businessman and with a deep commitment to education Mr. Bakshi continued, "Our mission is to promote the development of all areas of Science & Technology, Information Technology and Commerce and their applications to the highest possible levels of excellence, through meticulously designed training modules which ensure that students receive a well rounded education. Seedling training will give them a headstart in the profession of their choice. We educate students to prepare them for the challenges and demands of industry, government agencies and academia. Our comprehensive programmes cut across academic disciplines, giving students the opportunity to learn and grow in their chosen fields. The institutions provide an interactive learning environment and opportunities for communication and creativity."

Mission: The Seedling Group aims at establishing extensively networked educational research and development programmes. The research programmes are gradually expanding in areas like Biotechnology, Microbiology and Electronics. In particular the Group has earned widespread recognition in education by emphasizing computer enriched interactive learning. Students at Seedling find programmes on emerging areas taught way ahead of time. There is both flexibility and modernity in the courses.

Prof H.N.Verma (Former Pro Vice Chancellor) was eloquent in sharing his views: "SIILAS", he said "will serve as a role model for setting of other similar institutes in future, fostering the global outlook while at the same time being firmly rooted to the reality of the Indian Heritage. This Institute scores as its courses have a strong industrial matching and some of the best faculty in the country". The Institute also believes in fostering tangible links between students and faculty on the one hand, and industry, government and social scientists on the other, so as to bring to bear the best professional capabilities in science and technology, information technology and commerce to provide solutions to any problems relevant to the country from a scientific, strategic, commercial or societal point of view.

"The Seedling group is a class apart with a niche of its own due to the energetic experienced and dedicated faculty which metamorphoses students into human resources par excellence."

Yugadya Bhartiya, B.Sc., Biotechnology

Courses: A class apart, SIILAS is unique in that it has introduced the concept of integrated education i.e Five year integrated courses, leading to dual graduate and postgraduate degrees, in core areas after 10+2. The programmes offered by the Institute are comprehensive and specially structured.

Each of these courses are carefully crafted, flexible, modular, Interdisciplinary and focused professional programmes based on contemporary curricula designed for the students seeking exciting career opportunities and meeting the requirements of the Corporates, Banks, Marketing, HRM, Industries, Academia and other employers.
