

To **amaze**
everyone,
just tell **them**
what you work
on at HCL.

At HCL we challenge you everyday.
Challenge you to pilot technology that
can help one of the world's biggest
aircraft manufacturers navigate and
land aircrafts in poor visibility.
Challenge you to design medical
implantable devices for pain relief.

And then we really start pushing you.
Make you work on technology that
you always dreamt of. You could be
designing futuristic computer chips.
Working on sophisticated
semiconductor manufacturing
equipment. Developing breakthrough
solutions for automobile giants.
Working on the largest system
integration project in the country.
You could even be making computers
work on car batteries. The amazing
part is what you work on, will work
wonders for the world.

So if you are not scared of being
thrown off at the deep end, you know
which door to walk through.

TECHNOLOGY
that touches lives™
