

Chartered Accountancy

WINDS OF CHANGE

Accounting as a sphere of human activity is as old as civilization itself. However, with the growth of business, trade and commerce and industry in modern times and the magnitude of the transactions assuming gigantic proportions, the business environment has undergone sea change warranting proper appreciation of factors influencing the new economic order. Free flow of capital is now making accounting a highly specialised technical vocation. Accounting is no longer the prosaic ink-and-paper profession that it used to be. Accountants today manage financial data and – what distinguishes them from others – is their ability to look at money as a commodity. They are as core to business today as they were hundreds of years ago.

Chartered Accountant - A Well Rounded Professional

The Hon'ble President of India H.E. Dr. A P J Abdul Kalam while inaugurating the International Conference organised by the Institute said that "over

“ Intelligence and hard work are key requirements. Financially, this is a very rewarding profession. The highest starting salary offered on our on-campus placements last year was 38 lakhs p.a. ”

- CA, Sunil Talati, President, ICAI

the years ICAI and its members have made a name for themselves in the development of discipline as well standards of accounting. The Chartered Accountant community of India is one of the largest in the World.” Hon'ble President also stated that “The members of ICAI have been contributing to the growth and the maturity of manufacturing and the services sector of the nation during the last 55 years.”

The Chartered Accountant or CA as he/she is often called – is trained to perform a vast array of functions covering entire gamut of operations of a typical modern organisation, as consultant, planner, leader, manager, accountant, auditor and advisor. A Chartered Accountant in practice or in service is at heart of business operations.

The Chartered Accountant is trained to perform a vast array of functions covering entire gamut of operations of a typical modern organisation, as consultant, planner, leader, manager, accountant, auditor and advisor. A Chartered Accountant in practice or in service is at heart of business operations.

The Institute of Chartered Accountants of India (ICAI)

A statutory body established under the 'Chartered Accountants Act 1949 to regulate the profession of chartered accountants in India, provides a comprehensive education, training and practical exposure & experience to Chartered Accountants making them a Well Rounded Professional.

A comprehensive & rigorous job training and a very tough and high standard examination ensures that only those persons who possess very high level of knowledge, intelligence, experience and command on the subject covered by Chartered Accountancy are able to qualify as Chartered Accountant. Making of a Chartered Accountant ensures a very deep rooted knowledge coupled with a commitment to work hard.

International Initiatives

The Institute is a founder member of various International professional bodies such as the International Federation of Accountants (IFAC), Confederation of Asian and Pacific Accountants (CAPA), South Asian Federation of Accountants (SAFA), besides the International Accounting Standards Board (IASB). It has also become a founder member of the International Innovation Network (IIN).

Globalisation has accelerated the shift in focus from “Numbers” to “Strategic Thinking”, metamorphosing accountants to be critical members of the Management Team. Indian chartered accountants are not only aware of the global trends but are ready with globally acceptable solutions as well.
