

Maruti Suzuki

Automobile

Maruti Suzuki India Ltd operates four manufacturing facilities, three of which are located in Haryana at Gurugram, Manesar, and Kharkhoda, while the fourth is located at Hansalpur, Gujarat. India's biggest carmaker's total manufacturing capacity rose to 29 lakh units per annum as it commenced commercial production at the fourth plant (Plant D) of its Hansalpur facility in Gujarat. This makes Maruti Suzuki's Hansalpur facility India's largest passenger vehicle manufacturing facility at a single location.

Dixon Technologies

Consumer durables

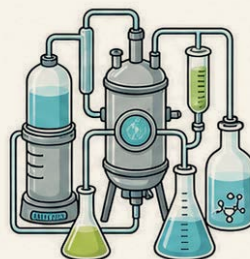

From manufacturing Cathode Ray Tube televisions for LG Electronics out of a rented shed in Noida 33 years ago to building mega factories that make smartphones and displays for major brands, Dixon Technologies has come a long way. Dixon, which has around 25 manufacturing units, is setting up a greenfield one-million-square-foot factory in Noida and planning a large manufacturing campus in south India, with discussions underway with the Andhra Pradesh government.

Jindal Power

Power generation & distribution

Jindal Power is now entering the next phase of its growth journey, with a stated 2030 road map to build more than 10,000 MW of thermal and renewable combined capacity which includes, pump storage, floating solar, battery energy storage, and nuclear. The strategy envisages growth through diversification, cross-border partnerships and smart energy solutions, while continuing to improve the efficiency and sustainability of its existing assets.

Clean Science and Technology Ltd

Chemicals

Clean Science and Technology Ltd is a fine and specialty chemical manufacturing company incorporated in 2003.
