

Coal India

Mining & mineral products

Coal continues to anchor India's energy security. The state-run miner is creating new growth platforms that build on its engineering strengths and resource base. Looking ahead, the company is preparing a broader coal gasification programme with planned investments of around ₹50,000 crore. Alongside strengthening its core business, it is creating new opportunities across coal gasification, critical minerals, renewable energy, battery storage and power generation.

Adani Power

Power generation & distribution

Adani Power is undertaking India's largest private-sector thermal power expansion programme with over ₹2 lakh crore capex. This will increase its generation capacity from over 18 GW today to 45 GW by FY32. Beyond thermal, it is diversifying its portfolio through international hydropower, targeting 5 GW of capacity in the period. Adani Power is also actively preparing for the next chapter of India's energy transition by evaluating opportunities in nuclear power.

Arrow Greentech

Plastic products

Arrow Greentech Ltd., founded in 1992, develops water-soluble films and green packaging solutions. Its products serve health, hygiene, packaging, printing and security industries. The company introduced its Watersol water-soluble film in the mid-1990s. Listed on NSE and BSE, Arrow Greentech has manufacturing facilities in India and the UK through its subsidiary, Arrow Green Technologies (UK) Ltd.

Sun Pharma

Pharmaceuticals

Sun Pharma is broadening its growth strategy beyond branded generics with its \$11.75-billion acquisition of Organon adding women's health, biosimilars and established brands. The deal, expected to close in early 2027, could raise innovative medicines' contribution to 27%. Sun is also expanding into GLP-1 therapies, adding manufacturing capacity and strengthening its innovative medicines portfolio, while continuing to grow its generics business.
