

Nandhiji's vision is to translate those nine principles into digital systems from certification engines to learning platforms making consciousness measurable and actionable.

Bringing together decades of experience in organizational strategy, digital ecosystems, creative transformation, and consciousness research, CNESS will build technologies that connect purpose with performance.

The company aims to create a Consciousness Infrastructure designed for the next evolution of human systems. This digital ecosystem will combine social media, wellness, and e-commerce.

Since 2021, Nandhiji has served as CEO of CNESS Inc, a technology-driven social platform integrating artificial intelligence (AI) with conscious networking.

Born into the Ayya Nadar family in Sivakasi, Tamil Nadu, Nandhiji is also the founder of several US-based nonprofit organizations.

Among other things, his teachings also guide seekers to live the joy of Turiya where clarity, peace, and lasting fulfillment unfold naturally.

Mindful leadership integrates corporate skills with emotional intelligence, empathy in decision-making to create an engaged enterprise.

While CNESS remains the umbrella under which Nandhiji's company has developed digital tools namely CNESS Ecosystem and Certification Framework, CNESS SuperApp and CNESSWORKS, all of which are aimed at creating a technology-led conscious ecosystem and Ariven

AI, a proprietary technology for promoting conscious connection and collaboration. These are four interconnected products.

**While CNESSWORKS is an app for**

**organizations, the CNESS Super App is a marketplace with measurable consciousness. Some key products include music and guided meditation tools among others.**
