

# “Gujarat Offers What Matters Most: Speed, Scale, and Certainty”

**Gujarat Chief Minister Bhupendra Patel** on what is powering the state's manufacturing boom, the opportunity from shifting global supply chains, focus on next-generation industries, and why governance, not incentives alone, will determine who wins the investment race

BY CHETAN BHUTANI

G

Gujarat has long been at the heart of India's industrial story. Now, as India seeks to accelerate manufacturing and become a developed economy by 2047, the state is looking to extend that advantage into a new generation of industries.

**Business Today's India@100** research ranks Gujarat as India's top manufacturing state. Its manufacturing gross value added (GVA) has risen from nearly ₹2 lakh crore to more than ₹4.4

lakh crore in 10 years. The state has built on traditional strengths such as chemicals, pharmaceuticals, textiles, engineering, gems and jewellery and ceramics, while expanding its focus to semiconductors, electronics, electric mobility, green hydrogen and other emerging sectors.

Gujarat is also seeking to leverage the reconfiguration of global supply chains while strengthening its MSME ecosystem and preparing workers for technology-intensive manufacturing. Its latest policy push includes the Viksit Gujarat Industrial Policy 2026 and the Viksit Gujarat Data Centre Policy 2026-29, which seek to marry advanced manufacturing with digital infrastructure.

In an interview with, Gujarat Chief Minister Bhupendra Patel explains what has driven the state's manufacturing leadership, why execution and
