Gujarat always had a strong manufacturing base in chemicals, pharmaceuticals, automobiles, electronics, renewable energy, ports

INDIA'S LARGEST CAR

maker Maruti Suzuki started commercial production from the fourth plant at its Hansalpur manufacturing facility in Gujarat in July this year. The plant has a capacity of 250,000 units per year, taking the overall capacity in Hansalpur to one million units per year.

The company has invested ₹25,289 crore in Hansalpur over he years. It is the first Suzuki facility anywhere with an annual capacity of one million. It is also India's largest single-location passenger vehicle plant.

Maruti Suzuki is one of many companies that have contributed to Gujarat building a large manufacturing base. In May 2026, Japanese auto giant Honda's Indian two-wheeler arm announced an investment of ₹920 crore to set up a fourth production line at its manufacturing plant in Vithalapur, also in Gujarat. The state has topped the BT study on India's top manufacturing states.

The new line, which will begin operation in 2027, will have a production capacity of 650,000 units per year, and will take the total annual capacity in Vithalapur to 2.6 million units, making it the largest assembly plant for Honda motorcycles globally. Honda's local rival Hero MotoCorp already operates a large plant in Gujarat's Halol.

Automobile is not the only area bringing huge investments in Gujarat. Tata Electronics is building a
