

investment. At the Vibrant Gujarat Regional Summit this year, Reliance Industries Chairman Mukesh Ambani announced plans to invest ₹7 lakh crore in Gujarat over five years, double the ₹3.5 lakh crore it had invested since 2021. Reliance already operates its largest refin-

ery in Jamnagar and is building gigafactories for green hydrogen, photovoltaic panels and energy storage batteries, among others. Jamnagar will also house India's largest AI-ready data centre.

Gujarat has already had a strong manufacturing base in areas like

chemicals, pharmaceuticals, oil refining and tiles. Now, it is attracting massive investments in areas like automobiles, electronics, renewable energy, ports and even ship building. Aided by supportive policies, the state has in recent years emerged as India's largest manufacturing hub.

Based on the BT-Deloitte 2022-23 data, Gujarat ranked number one in the country in terms of manufacturing gross state value added (GSVA) growth over both five-year and ten-year periods. GSVA essentially measures the net output of the manufacturing sector after deducting the cost of raw materials and other inputs from the total output of manufactured goods.

Not only that, Gujarat has also emerged as an investment ace, getting the top rank in terms of capital invested. Not surprisingly, the state is also the numero uno in exports.

Emergence of mega ports like Gujarat Pipavav Port, in which Denmark's APM Terminals holds a majority stake, and the Adani Group-owned Mundra Port, along with its proximity to West Asia, have helped Gujarat become a major exporter.

"With India's longest coastline of about 2,340 km, 49 ports and nearly 39% of the country's cargo handled through Gujarat, the state has established itself as India's gateway to global trade," says Gujarat Chief Minister Bhupendra Patel.

In July, the Gujarat government announced its shipbuilding and ship repair policy. The state wants to develop an integrated mega shipbuilding park under the policy.

The Union government has already approved the establishment of a mega shipbuilding cluster at Kuchhadi in Porbandar district.

THE NEW INDUSTRIAL POLICY
