

COHESIVE GROWTH

Sanjeev Sanyal, Member, EAC-PM

- 98 | » "India's manufacturing progress cannot be measured solely by its share of GDP. Pure manufacturing is 16% of GDP. Do remember that it is a relatively stable proportion of a rapidly growing economy, which means that the sector is growing. This idea that it's not growing by looking at proportions makes no sense because the overall economy is growing," he said

REGULATION TRAP

P. Chidambaram, Rajya Sabha MP & former Union Finance Minister

- » "Current rules and regulations on the statute book are worse than in 1991. The economic design is trapped in regulation, investigation and enforcement, crony capitalis. It's a rules-and-regulations *raj* and not a licence *raj*, but it is as formidable as the old licence *raj*"

CAPEX CHALLENGE

Jayant Sinha, President of Everstone Group, Former MoS, Finance

- » Pointing to the widening investment gap in AI infrastructure, Sinha said annual corporate capital expenditure in India stands at about \$150 billion. In comparison, companies such as Microsoft are deploying enormous sums into data centres. Data-centre investment itself needs to rise substantially for India to be competitive, he said
