BUILDING BHARAT'S INFRA MUSCLE

(From left) **Bharat Kaushal**, Corporate Officer, Hitachi Ltd, Executive Officer, Hitachi India

Amit Gossain, MD, KONE Elevator—India & South Asia

Rajeev Garg, Chief Sales Officer, Jindal Stainless

Ankur Periwal, MD, KPT PIPES

» “The original idea was we export out of India. But, the business that we have with the deals at hand in India is very telling,” said Bharat Kaushal

» “When you build infrastructure, or you build factories, business information modelling becomes extremely important even for smaller businesses,” said Gossain

» Garg called on the need

for sustainable solutions for infrastructure development

» “Supply chain management has improved a lot in the last few years,” said Periwal. Despite all the development that is happening in India, Periwal feels it’s still going to be an uphill task when it comes to scaling up exports, especially when compared with China. He said it would take another 15-20 years to get there

nectivity, accelerating industrial expansion, enabling sustainable urbanisation, and improving the quality of life for over a billion citizens.

Held on July 31, centered on the theme “Infra India 2047: Building India’s Next Growth Cycle”, the summit explored the policies, partnerships and innovations driving the nation’s infrastructure transformation.

Industry leaders gathered to deliberate on how the infrastructure push must now expand beyond highways to smarter logistics, sustainable transport, energy-efficient industries and investor-friendly reforms to sustain long-term economic growth.
