

Two Folds, Two Philosophies

Two new-generation foldables take different approaches. Samsung pushes slimness and a content-first design, while Google prioritises durability, software and AI. However, neither approach comes without compromises **BY AISHWARYA PANDA**

4,800 mAh battery with 45W wired charging

SAMSUNG GALAXY Z FOLD 8

₹1,79,999

The Galaxy Z Fold 8 is a statement of Samsung's maturity and its standing in the foldable market.

SAMSUNG GALAXY Z FOLD 8 MOST PRACTICAL FOLDABLE

► THE GALAXY Z FOLD 8 is

Samsung's latest foldable phone, introducing a new passport-style silhouette. First of its kind and the lightest foldable at 201 grams, with a slim 4.5-mm waistline, making Samsung's earlier foldables look almost clumsy by comparison.

The 5.5-inch cover display stands out with its wider, more practical design, and the 7.6-inch canvas turns multitasking into muscle memory. The power is

driven by the Snapdragon 8 Elite Gen 5 SoC, capable of running Galaxy AI, performance-intensive workloads, and gaming without breaking a sweat.

Samsung positions the Galaxy Fold 8 as the "content-native" device, and it lives up to the hype, offering a natural experience when reading, streaming, and multitasking, giving the impression that it is designed around the screen. The dual-camera set-up manages to capture breathtaking images, making it the most convincing foldable Samsung has ever built.
