

Super Achievers

RESHMA KEWALRAMANI

CEO & PRESIDENT,
VERTEX PHARMACEUTICALS

Physician-scientist Reshma Kewalramani leads US-based biopharmaceutical company Vertex Pharmaceuticals, overseeing its work in cystic fibrosis, genetic medicines, and gene-editing programmes. Born in Mumbai and raised in the US, she is trained in internal medicine and nephrology at the Harvard Medical School before entering the biopharma sector. She joined Vertex in 2017 and became CEO in 2020, guiding its research pipeline and global regulatory strategy. Her work reflects a focus on science-driven drug development and long-term therapeutic programmes.

RITU KARIDHAL

MISSION DIRECTOR,
CHANDRAYAAN-3, ISRO

Ritu Karidhal is a senior scientist at ISRO with key contributions to India's interplanetary and lunar missions. She has worked on the Mars Orbiter Mission in mission planning and operations and later has served as Mission Director for Chandrayaan-3, overseeing the mission's trajectory design and operational planning. A postgraduate in physics from Lucknow University, she joined ISRO in the late 1990s and has since worked across spacecraft control, mission design, and systems engineering. She also contributes to training and mentoring programmes within ISRO, particularly for younger engineers entering mission operations and planning roles.

REVATHI ADVAITHI

CEO, FLEX

Revathi Advaiti has been serving as CEO of Flex Ltd since 2019, steering the global manufacturing company through a significant transformation. In FY25, the firm posted \$26 billion in revenue. Her strategic focus on cloud-infrastructure services—growing at around 40% annually—has positioned Flex to capitalise on the AI and data-centre boom. Advaiti champions sustainability, diversity, and up-skilling a global workforce of more than 1,40,000. Advaiti is also a board member, MIT Presidential CEO Advisory Board Member at Massachusetts Institute of Technology.
