

Super Achievers

SULAJJA FIRODIA MOTWANI

FOUNDER & CEO,
KINETIC GREEN

Sulajja is a pioneer in India's electric vehicle sector—a space generally dominated by men. She has led the company to become a leading maker of electric three- and two-wheelers, with a strong Make in India focus. She recently formed a JV with Tonino Lamborghini to bring global design for electric and solar golf carts and tourism vehicles. A Carnegie Mellon MBA, she drives Kinetic Group's strategy and is widely recognised with top national awards for her leadership in green mobility.

SUMAN MISHRA

MD & CEO, MAHINDRA LAST
MILE MOBILITY

Mishra spent six years with the Mahindra Group working across various roles before she took a leadership role. Her advice to women aspiring for leadership positions is simple: make your choices boldly and stand by them. "There are no 'wrong choices' if it is yours!" she says. Mishra believes people should yes to opportunities even if they feel they are not ready. Leadership, according to Mishra, is a long pursuit and to truly enjoy it is to stay anchored in who you really are. Her most significant learning has been the impact of purpose-driven leadership.

DR. SWATI PIRAMAL

VICE CHAIRPERSON, PIRAMAL
GROUP

Dr. Piramal has worked across pharmaceuticals, public health, and R&D. She has contributed to the group's scientific collaborations, health communication, and global partnerships, drawing from her training at Harvard School of Public Health. A Padma Shri awardee, she has served on several government committees and academic boards, including the Harvard Board of Overseers. Her involvement extends to the Piramal Foundation's programmes in community health, and education.
