

Madhya Pradesh Emerges as Investment Magnet Under CM Dr. Mohan Yadav with Multi-Lakh-Crore Proposals

Narendra Modi
Prime Minister

Strong Investment Inflows via Industrial Conclaves & Global Outreach

CM Dr. Yadav government has actively conducted multiple regional and international investment conclaves to attract large-scale industrial proposals. In one major outreach session, Madhya Pradesh received ₹36,600 crore worth of proposals from industries in Hyderabad and other southern states. During an investor meet in Mumbai, sectors like renewable energy, white goods, textiles, and pharmaceuticals submitted proposals exceeding ₹74,300 crore. Across various conclaves, the cumulative value of “investment proposals” is stated to be several lakh crores, reflecting strong interest from domestic and global investors across sectors.

Policy Reforms & Business-Friendly Industrial Framework

The government introduced the Madhya Pradesh Industrial Promotion Policy, 2025, aimed at attracting large industries, FDI, and innovation-led enterprises.

The policy provides:

- ☑ A simplified regulatory environment
- ☑ Time-bound approvals
- ☑ Incentives for manufacturing, R&D, and capital-intensive industries

The state has significantly reduced procedural burdens, making it easier

to establish new industries. Sector-specific incentives have been rolled out for renewable energy, electric vehicles, medical devices, pharmaceuticals, textiles, and high-value manufacturing. Dedicated support for textiles and food processing includes subsidies, infrastructure support, and streamlined clearances.

Launch of New Industrial Units & Expansion of Industrial Infrastructure

CM Dr. Mohan Yadav performed Bhoomi Pujan and distributed land-allotment letters to new renewable energy units in the Mohasa–Babai industrial region, which has been expanded dramatically from 227 acres to 884 acres. New industrial hubs, including developments at Acharpura Industrial Area, are being established across the state. Upcoming industries include sectors such as textiles, pharmaceuticals, electronics, and agritech, expected to generate significant employment and business activity.

Strategic Push in High-Potential Sectors

Madhya Pradesh is positioning itself as a major destination for renewable energy investments, aligning with national clean energy goals. Under the 2025 policy, the state is promoting textiles and garment

Dr. Mohan Yadav
Chief Minister, Madhya Pradesh

manufacturing, seeking to attract both domestic and global apparel companies. This strategic diversification indicates a shift toward a modern, globally competitive industrial economy beyond traditional sectors.

Employment Generation, MSME Support & Skill Development

The government projects substantial job creation through industrial expansion and policy-led investments. Land near major industrial parks is being designated for Skill Parks, ensuring a trained local workforce for upcoming industries. Streamlined processes, MSME incentives, and startup-friendly initiatives aim to boost entrepreneurship and ensure inclusive industrial growth.
