JK Cement had a grey cement capacity of 28.3 mtpa at the end of the third quarter of FY26. It recently started a 3 mtpa grey cement grinding unit in Buxar, Bihar, which will take its capacity to over 31 mtpa. What's more, it gives the company access to the fast-growing Bihar market, which is seeing a massive infrastructure push, says Singhania.

JK Cement has also announced a 7 mtpa expansion in Bikaner. This includes an integrated unit in Jaisalmer, which has massive deposits of limestone and will probably become the cement hub of Rajasthan, says Singhania, a technocrat with a Bachelor's degree in Electrical & Computer Engineering from Carnegie Mellon University, US. He also holds a Diploma in Family Business
