

ble from the current 600 mtpa to 1,200 mtpa by 2030. Money will also go into increasing capacity in the renewables, thermal and airports businesses. “We aspire to be the cheapest ports-to-power conglomerate and logistics provider,” he declared

The company has been aided by the government’s continuing thrust on infrastructure. Adani views that as the key foundation. “If you don’t get that right, none of your manufacturing can happen,” he said. “At the end of the day, we are creating hard cash-generating assets and not valuation assets. We know our business and that gives us the confidence to keep going,” added Adani.

All of this has been done in a disciplined manner. An ICICI Direct report put out after APSEZ’s results for the third quarter of financial year 2025-26 says, “It has been maintaining financial discipline during its investment phase, with an approximate capex of ₹65,000-70,000 crore over FY25-29.”

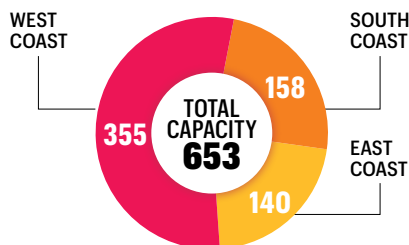

In many ways, infrastructure is about getting the little things right, with scale coming into play. “Operations are managed efficiently, as reflected in a turnaround time of 0.7 days, compared with approximately two days for state-owned major ports,” states Crisil’s report. It goes on to say that APSEZ benefits from its integrated logistics network. “Providing end-to-end logistics solutions to customers from the port to hinterland has led to stickiness, with 56% of cargo sticky in nature,” it adds.

A key part of the strategy is the handling of the cargo mix. In FY25, according to the Crisil report, cargo was well-diversified—33% coal, 42% containers, 6% crude and gas, and the rest with other cargo. “The share of the Mundra port in the total cargo has reduced consistently
