

wealth and asset management firm added 2.5 times the client base in the past three-four years than the preceding 12-13 years. Its brand recall among clients stayed strong, and client attrition, measured in terms of assets, remained low at 1.7% in FY25.

This was reflected in revenue from operations, which grew at a compound annual growth rate (CAGR) of 28% over FY21-25, while profit after tax rose 29% annually over the same period. Operational efficiency also improved, with cost-to-income falling to 45.9% in FY25, from 53.9% in FY21. Bhagat's efforts have been recognised in the BT-PWC India's Best CEOs in the Wealth Makers category. "For us, growth has not been cyclical. It has always been structural," Bhagat, MD and CEO at 360 ONE WAM, tells BT.

360 ONE WAM's growth has been anchored in a structural pivot, from product distribution, advisory, episodic revenues, to annuity-based payments. Bhagat recalls the decisive shift towards the annual recurring revenue (ARR) model in 2020 that has hugely improved the quality of earnings. He says the company moved from product distribution to offering solutions, positioning itself as a goals-based, open-architecture advisory platform.

"At the same time, we invested ahead of the curve in alternatives and built a scaled asset management franchise, strengthened our technology backbone, and institutionalised a culture of ownership through ESOPs for 100% of employees," says Bhagat.

360 ONE works in two broad segments. The wealth management business comprises distribution of financial products, equity and debt broking, advisory, management of financial assets and estate planning, largely in the nature of advisory services. Its asset management business primarily involves managing pooled funds under various products and structures, including alternative investment funds, portfolio management services and mutual funds. Bain Capital, via its affiliate BC Asia Investments X Ltd, held a 18.17% stake in the company as of December 31, 2025.

360 ONE WAM managed total assets of ₹7.11 lakh crore at the end of December 2025 against ₹2.46 lakh crore in March 2021. The 2025-end figure comprised wealth management assets of ₹6.12 lakh crore and ₹98,949 crore under asset management.

"UBS' 5% stake enabled offshore product bundling, and together, 360 ONE Capital is eyeing 1.5 times ARR AUM growth"
