

ARR assets, the key focus, stood at ₹3.18 lakh crore while the rest, ₹3.93 lakh crore, were transactional and broking revenue assets. Within ARR assets, wealth accounted for ₹2.19 lakh crore and asset management ₹99,000 crore.

Sameer Sawant, Research Analyst at Mirae Asset Sharekhan, says the acquisition of ET Money has made 360 ONE WAM a digital powerhouse. It has boosted retail and HNI distribution while cutting acquisition costs by 30-40% through tech-led onboarding. "It's already contributing to 30% year-on-year (YoY) growth in their distribution business," he says.

Sawant says B&K Securities, re-branded as 360 ONE Capital, bolstered institutional broking and stabilised transactional revenues. Acquiring UBS's onshore wealth operations for \$36 million gave instant access to the global Indian diaspora with ₹50,000-plus crore AUM potential. According to Sawant, UBS' 5% stake enabled offshore product bundling, and together, 360 ONE Capital is eyeing 1.5 times ARR AUM growth by FY28.

India has 45,000-50,000 families with \$5 million-plus net worth. The market is large enough to support three to five scaled players over time, Kotak Institutional Equities said in a recent note. One 360 WAM had 8,500-plus clients in wealth management as on December 31, 2025.

360 ONE WAM's total ARR for FY25 stood at ₹1,701 crore, growth of 28.2% YoY, contributing to 70% of revenues from operations of ₹2,446 crore. This was 31% annual growth over ₹580 crore ARR in FY21. ARR to revenues from operations stood at 73-77% and grew 40.4% YoY in the first three quarters of FY26.

Bhagat tells *BT* the company is aiming to maintain ARR net flows at 12-15% of opening ARR AUM annually, with yields across segments remaining stable.

As new teams mature and produc-

GOING BIG

- 01 **Decisive shift towards ARR model in 2020 reshaped quality of earnings**
- 02 **Growth has not been cyclical for 360 ONE WAM; it has always been structural**
- 03 **Aims to maintain ARR net flows at 12-15% of opening ARR AUM annually**
- 04 **Integration of recent acquisitions to unlock cost efficiencies**
- 05 **360 ONE WAM is known for industry-first offerings, including a pre-IPO fund in 2016-17**

tivity improves, revenue generation may accelerate without a proportional increase in fixed costs, he says, adding such a scenario may allow operating leverage to progressively strengthen the cost-to-income ratios.

"The integration of recent acquisitions will unlock cost efficiencies across technology, operations and shared services. Importantly, the ARR backbone ensures revenue visibility and resilience, while rising wallet share, alternative penetration, and institutional synergies enhance margin expansion," he says.

Sawant says 24% growth in PAT for 360 ONE WAM over FY23-FY25 was powered by robust organic flows, doubling of the UHNI client base, alternative expansion (real estate assets/PE), and a digital push via GIFT City. "Wealth may drive 22-25% AUM CAGR for the next few years via UHNI maturation and 10-12% flows. We expect consolidated PAT to grow by 20% CAGR and ROE to remain over the 20% mark in the medium term," says Sawant.

"Acquisition of ET Money and B&K Securities and the UBS partnership are aiding growth via expanding to affluent, institutional and global clients, respectively," says Raghvesh Sharan, Insurance & Capital Markets Research Analyst at JM Financial Institutional Securities.

Further, the B&K Securities acquisition expands research and product offerings in Indian equities and unlisted markets, while the UBS partnership unlocks global opportunities and platforms.

Bhagat's 360 ONE WAM is known for industry-first offerings, including a pre-IPO fund in 2016-17, a secondary fund in 2022-23, and, more recently, a space and defence fund.

These would come in handy while navigating the choppy global markets due to the West Asian crisis. **BT**
