EVER THOUGHT YOUR daily expenses and geo-spatial affluence around home could decide your loan status? That is what L&T Finance is doing to enable differentiated and personalised offerings, drastically expediting loan disbursement.

L&T Finance has launched Cyclops, an in-house developed, artificial intelligence (AI)-driven digital credit engine, determining the repayment capability and credit quality of potential customers.

The new model allows for the use of non-traditional trust signals like expenses as a proxy for income via payment aggregators, geolocation and geospatial affinity to enable differentiated and personalised offerings. The L&T Finance is the winner this year in the Best in Innovation (Large NBFCs) category in the BT-KPMG Survey of India's Best Banks and NBFCs.

According to the company, Cyclops analyses customer expenses as a proxy for income, primarily sourced through payment aggregators, and the engine synthesises geo-spatial affluence indicators from
