UNDERSTANDING INDIA'S GDP REVAMP

For over a decade, India has been measuring its economy using a 2011-12 lens. But the India of 2026—with the rise of digital payments and the gig economy—looks nothing like it did 14 years ago. To bridge this gap, the Ministry of Statistics and Programme Implementation has finally hit the refresh button on macroeconomic indicators. It not only changed the base year for the gross domestic product (GDP) and consumer price index (CPI), but also revised the methodology to make it more robust

A NEW BASE YEAR

India has revised its GDP base year after a gap of 11 years from 2011-12 to 2022-23 as of February 27. This is the longest such gap since the 1993-94 revision. During this time there were many disruptions like the introduction of the GST, demonetisation, and Covid-19 pandemic

DATE	OLD BASE YEAR	NEW BASE YEAR	GAP SINCE LAST REVISION (YEARS)
August, 1967	1948-49	1960-61	-
January, 1978	1960-61	1970-71	11
February, 1988	1970-71	1980-81	10
February, 1999	1980-81	1993-94	11
January, 2006	1993-94	1999-00	7
January, 2010	1999-00	2004-05	4
January, 2015	2004-05	2011-12	5
February, 2026	2011-12	2022-23	11
