“India’s developer community is one of the most vibrant, and enabling this community is central to our long-term strategy”

enterprise-grade. In India, where adoption is rapid and diverse, this becomes even more important. Finally, skilling plays a key role.

Infrastructure and skills alone are not enough. Organisations also need to build a

culture of experimentation. I often advise leaders to empower teams to experiment, identify real customer problems and iterate quickly. AI enables firms to rethink customer experiences, operating models and entire industries.

How is AWS making AI services and training more affordable in a price-sensitive market like India?

Investment in infrastructure is fundamental. To make AI accessible and afford-

able, organisations need scalable computing resources, flexible models and tools that allow them to build and deploy solutions efficiently.

AWS has developed a range of AI models designed to balance
