Sabyasachi Goswami, CEO, Perfios
Sanjay Doshi, Partner & Head Financial Services Advisory, KPMG India
Parag Bhise, CEO & ED, Nucleus Software

» “We’re still scratching the surface. Nothing much has happened,” said Goswami on AI adoption. “If you have not been able to create any new products using AI... I think we are not doing justice to AI truly”

» Doshi said this is not a one-time event where AI will change the world overnight. “It is reimagining banking,” he noted.

» Bhise of Nucleus Software emphasised that AI must be embedded into core banking platforms rather than layered on as an add-on

VIBRANT ECONOMY

(From left) **Ashima Goyal**, Professor Emeritus, IGIDR
Madan Sabnavis, Chief Economist, Bank of Baroda
Soumya Kanti Ghosh, Group Chief Economic Advisor, SBI

» Noted economist Goyal said the new GDP series released recently shows the diversity of the Indian economy. “It shows that manufacturing has been doing well, investment has been doing well, farm incomes have gone up”

» Speaking at the Business Today Banking & Economy Summit, Ghosh said, “Improvements are an ongoing process. But that does not mean

that you are going to discredit the statistical system of a country which has been filled up assiduously over the years”

» Sabnavis said he feels it’s perhaps time that bank deposits are given some tax incentives to make them attractive, adding that conducting open market operations to address liquidity conditions can only be a short-term solution
