

A Sustainable India

Hitachi's Voyage in India: Empowering Lives Through Innovation

India's relentless journey towards progress is a narrative of visionary transformation - a story powered by a commitment to innovation, digitalisation, and inclusive growth. With its sights set on creating high-tech infrastructure, including smart cities, cutting-edge transportation systems, and ambitious renewable energy projects, India is not just evolving; it

is redefining the future.

In this era of India's global recognition and unprecedented progress, Hitachi India has emerged as a key Business to Business to Consumer (B2B2C) partner, working closely with the Government of India and industries to drive impactful, citizen-centric solutions. With a rich legacy of over nine decades in

India, Hitachi has evolved from a solutions provider to a co-creator of the nation's future through deep integration across sectors like infrastructure, mobility, energy, payments, and digital technologies, becoming an integral part of the journeys of billions.

Energy: The Lifeblood of Progress

Energy is not just the fuel of progress; it is the lifeblood that powers every vein and artery of India's growth. Hitachi stands at the helm of this energy revolution, steering the nation towards a greener, carbon-neutral future. With Hitachi Energy's collaboration and world-class Transmission and

Distribution (T&D) solutions—including High Voltage Direct Current (HVDC) and Ultra High Voltage Direct Current (UHVDC) transmission corridors—Hitachi is shaping the landscape of India's energy infrastructure. As India races towards its goal of achieving 500 GW of non-fossil electricity by 2030 and Net Zero by 2070,¹

Hitachi Energy's involvement in monumental projects like the 4.75 GW renewable energy park in Gujarat, part of India's largest solar park when completed, is fortifying the very foundation of India's sustainable future.

Raigarh-Pugalur UHVDC Link

6000 MW of reliable power transmission over 1800 km

80 million people empowered

HVDC Infeed Link to Mumbai

Will supply 1,000 MW to Mumbai To enhance power supply by 50%

Mobility: Connecting Journeys & Communities

Mobility is more than movement; it is the lifeline that connects communities, drives economies, and enriches the lives of billions. In an era of rapid urbanisation and technological advancement, Hitachi is redefining the future of transportation through Hitachi Rail India's end-to-end solutions—from energy-efficient rolling

stock to smart mobility systems and digital signalling. By partnering in landmark projects like India's first underwater metro, the Kolkata East-West Metro, the nation's inaugural Centralized Traffic Control (CTC) system, and first of its kind implementation of Mobility as a Service (MaaS) in India by integrating mainline

railway and Delhi Metro on one platform, Hitachi Rail is not just addressing today's transportation challenges; but also laying the groundwork for tomorrow's seamless, sustainable mobility experiences.

Kolkata East-West Metro

30-second unparalleled experience through an underwater stretch

Western Dedicated Freight Corridor

Connects India's largest industrial belt between Dadri in Uttar Pradesh with the Jawaharlal Nehru Port in Navi Mumbai

Udhampur-Srinagar-Baramulla Rail Link

Links Kashmir with the rest of India for seamless connectivity
