

An Enduring Commitment to Futuristic Medtech Solutions for a Healthier World

A veteran of over 25 years leadership standing within the healthcare industry, Mr Vivek Shah, CEO, Meril, is steering the Indian conglomerate as a global medical device manufacturer and solutions provider having presence in over 150+ countries. Established in 2006, today, Meril, is enriching people's lives through more than 100 cutting-edge technologies across specialities in vascular intervention devices, orthopaedic implants, robotics, endo-surgery, ENT products, cardiac surgery, peripheral intervention and in-vitro diagnostics.

Vivek Shah
CEO, Meril

What are the core values that have shaped Meril's success story?

As India's one of the medical device manufacturer and healthcare solutions company, we believe in continually raising our benchmarks through excellence in seeking answers to some of medical devices and technology's toughest questions. This spirit is demonstrated in our steadfast commitment to build Meril's manufacturing prowess, its R&D and innovation in developing medical technology, scientific communication, exploring and expanding contemporary distribution avenues. Meril's one of the largest, 250,000 square feet state of the art suture manufacturing plant facility commits in reshaping the healthcare landscape.

What drives Meril's delivery of world-class healthcare solutions?

I take pride in saying that Meril's presence in over 150+ countries across the world is powered by a strong team of 10000+ committed employees. The company owns 100% subsidiaries in India, USA, Germany, Brazil, Russia, South Africa, Bangladesh and Turkey serving over millions of customers with the support of more than 2500 plus channel partners and has aided a staggering approximately 30 lacs successful

surgeries. These statistics speak volumes about Meril's commitment to innovation, design and development of novel, clinically relevant and game changing medical devices. In addition, the vast 250,000 square feet Meril Park, a dedicated manufacturing and R&D facility for in-vitro diagnostic, orthopaedic, endo-surgery and cardio vascular solutions and cardio vascular manufacturing comprising 40,000 square feet of built-up area along with 10,000 square feet of clean rooms form the backbone of Meril's in-house manufacturing capabilities that gives us an edge.

What is the emphasis that you give to research, which is a vital component of medical device manufacturing?

At Meril, we aim to identify unmet clinical needs and introduce relevant devices in quick turnaround time. We owe our reputation as trendsetters in new product introductions to our robust R&D facility, which hosts more than 150 R&D personnel with cross functional relationships.

While ensuring stringent adherence to uncompromising quality standards in manufacturing, scientific communication and distribution to deliver path-breaking healthcare products to the world, the R&D team is engaged in a 3-tier philosophy, comprising smartly iterated products that cater to clinical needs in existing therapeutic segments and

novel products in evolving segments which will form the next generation of treatment modalities and esoteric medical technologies and devices which are truly disruptive and treatment changing to nurture healthcare practitioners. Our core commitment is to deliver advanced healthcare solutions through research and development, which is reflected in our diverse offerings. Meril encourages research and academic collaborations with physicians and global innovators to identify clinical gaps and develop revolutionary products and solutions, besides being open and receptive to interact on exciting opportunities.

Could you share some of Meril's innovative medical devices and medtech solutions?

At Meril, we champion the need to accelerate positive change in medtech solutions with a wide range of efficient and accessible medical devices that have been perfected to ensure that every product is patient-centric. We have developed more than 100 state-of-art devices which demonstrates our dedication to innovation, design and development of novel, clinically relevant medical solutions. Among Meril's noteworthy innovations are Biomime Sirolimus Coronary Stent System, Merifeim Absorbable Gelatin Sponge which dissolves on its own over a period of 2-3 years, Mirus Cutter and Mesire- Balloon Sinus Dilation System.

What are Meril's initiative in professional education?

Meril has committed to 12 academies globally with state-of-the-art training centres for clinical and non clinical stakeholders, thus improving patient care. Meril first's Academy is spread across a sprawling 100,000 square feet of property in Vapi, Gujarat. It was built with the aim to empower those responsible for the future of healthcare by bridging the gap between rapidly evolving advancement in technology and its impact on surgeries and their outcomes. The vision behind having multiple academies is to disseminate cutting-edge scientific knowledge to physicians, surgeons, technicians, paramedics and hospital personnel by global KOL faculty with innovative and modern training modalities.
