REVIEW

CHALLENGING THE BEST

OPPO positions itself as a serious challenger in the flagship smartphone arena with the Find X8 Pro, boasting high-end specifications.

At the heart of its appeal is a focus on camera innovation, thanks to its partnership with front camera and lenses manufacturer Hasselblad. The quad-camera system features four 50MP sensors, excelling in wide, ultra-wide, telephoto, and periscope modes. The dual periscope lenses provide optical zoom up to 6x and digital zoom up to 120x, delivering impressive results for capturing distant subjects with consistent quality. Daytime photography stands out with sharp details, natural colours, and balanced exposures, making it ideal for photography enthusiasts.

While low-light performance is decent, it falls slightly behind competitors like the Google Pixel 8 Pro, occasionally losing detail and sharpness. The "AI Telescope Zoom" feature enhances long-distance shots, but the advantage over other flagships is minimal. Nevertheless, the overall camera experience is polished and versatile, appealing to those who prioritise photography.

The design enhances the
